

ALTER MODUS INTERNATIONAL (AMI)

GLOBAL HEALTH | PROGRAM ASSURANCE | MONITORING, EVALUATION & CAPACITY BUILDING

Corporate Capability Statement • Prepared for SBAIC / U.S. Department of State GHSD

COMPANY OVERVIEW

Alter Modus International Corporation (AMI) is a minority-owned U.S. government contracting firm supporting USAID, CDC, and HHS. AMI integrates monitoring, evaluation and learning (MEL), program and internal audit support, data validation, survey research, financial and business analysis, capacity building, and enterprise risk assessment. Our work helps government clients test reported results, identify implementation risks, strengthen institutional controls, and turn evidence into operational improvements. AMI and the nonprofit Global Alliances are separate organizations.

CORE CAPABILITIES | ADVISORY & PROGRAM ASSURANCE

Audit, regulatory review & program assurance. Internal audits of M&E activities; financial and operational process reviews; examination of program controls, compliance practices, and implementing-partner performance; business-process and cost reviews.

Data validation & quality assurance. Verification of data collection and reporting practices; indicator definition and tracking; quality-control procedures; data-risk identification; and strengthening the completeness, consistency, and reliability of performance information.

Surveys & field research. Design and execution of small- and large-scale surveys, statistical sampling, structured and semi-structured interviews, focus groups, stakeholder consultations, and participatory evaluations.

Data analysis, business intelligence & evaluation. Quantitative and qualitative analysis, statistical sampling, ANOVA, ANCOVA, regression, SPSS, performance indicators, business-impact analysis, evidence synthesis, and decision-ready reporting.

CAPACITY BUILDING & INSTITUTIONAL STRENGTHENING

AMI strengthens the ability of government agencies, implementing partners, and local organizations to plan, manage, monitor, and sustain programs. Our approach combines institutional and organizational capacity assessments with tailored technical assistance, coaching, staff mentoring, and practical tools. Areas of expertise include financial management and internal controls; compliance and audit readiness; budget, cost, and business analysis; performance measurement and data-quality assurance; enterprise risk advisory; and governance and process improvement. Drawing on multidisciplinary financial, audit, and management expertise, AMI supports risk-monitoring tools, financial models, corrective-action planning, and evidence-based management decisions. For USAID/Guatemala, AMI's scope of work covered individualized and group coaching for U.S. Foreign Service Officers and locally employed staff in speechwriting, executive communications, and professional writing, delivered through in-person and remote instruction. Our focus is knowledge transfer and practical, lasting institutional capability.

Risk assessment & management advisory. Enterprise and program risk frameworks, risk registers, mitigation plans, governance escalation tools, financial and operational risk screening, gap assessments, and process improvement.

RELEVANCE TO GLOBAL HEALTH SECURITY & DIPLOMACY

AMI's relevant work spans HIV/AIDS, orphans and vulnerable children, maternal and child health, nutrition, health information systems, vaccine communications, and interagency coordination. AMI links health-sector evaluation with partner capacity assessment, program controls, survey evidence, data integrity, and risk mitigation—capabilities applicable to global health security, foreign assistance accountability, and sustainable local ownership.

SELECTED FEDERAL HEALTH EXPERIENCE

CDC — National Center for Injury Prevention and Control. As subcontractor, supported a center-level risk framework, risk register and mitigation plans; developed tools for identifying and escalating emerging risks; and assessed governance and administrative processes for improvement.

USAID/Zimbabwe — OVC Ex-Post Evaluation. As prime contractor, assessed sustainability of care models and development outcomes across five districts, including locally led development and factors affecting continued results.

SELECTED EXPERIENCE | DELIVERY APPROACH | CORPORATE INFORMATION

ADDITIONAL RELEVANT PAST PERFORMANCE

USAID/Southern Africa — Health Program Advisory Services. Provided senior technical advice on HIV/AIDS and health programming across an 11-country region; assessed health financing, private-sector participation, institutional capacity, donor activities, and program gaps; and supported health-sector strategy and results frameworks.

HHS — National Vaccine Program Office. Supported vaccine outreach strategy, communications, training, webinars and public information management; conducted an audit of existing information materials to inform revised outreach goals.

HHS — Office of Global Affairs / PEPFAR. Provided meeting and event planning, stakeholder logistics, communications materials, travel coordination, and administrative support for PEPFAR-related activities.

Uganda — Ministry of Health / ACE Project. Improved health data collection, compilation and reporting; supported a national web-enabled health information system rolled out to 25 districts; and strengthened the capacity of five local NGOs.

Liberia — HANDS Maternal and Child Health & Nutrition. Led M&E activities, assessed performance results, collected and analyzed data, and developed recommendations supporting portfolio review and alignment with Ministry of Health priorities.

Ghana — HIV/AIDS and Community Health Programs. Supported training, M&E, local partner implementation, stakeholder engagement, and program design for health and home-based care initiatives.

NONPROFIT AFFILIATION / COMMUNITY ENGAGEMENT

Global Alliances (www.gainitiative.org) is AMI's nonprofit organization dedicated to advancing sustainable development, strengthening institutions, and empowering communities through evidence-based solutions and strategic partnerships. Working across global health, agriculture and food security, economic development, education, and workforce development, the organization seeks to improve program effectiveness, strengthen local capacity, and promote lasting social and economic impact. Its approach emphasizes monitoring, evaluation, research, and learning (MERL), organizational capacity building, institutional strengthening, and data-driven decision-making. Global Alliances Initiative aims to translate development priorities into measurable outcomes, greater accountability, and sustainable, locally led solutions.

HOW AMI SUPPORTS FEDERAL CLIENTS

1 Diagnose. Review program objectives, operating environment, risks, controls, partner capacity, and available evidence.

2 Verify. Design appropriate surveys and data-quality checks; validate reported results and analyze implementation performance.

3 Improve. Deliver actionable audit/evaluation findings, risk mitigation plans, training, stronger reporting systems, and management recommendations.

DIFFERENTIATORS | EVIDENCE TO ACTION

- Integrated audit, MEL, surveys, statistical analysis, data validation, and risk advisory.
- Institution-focused training, coaching, and transfer of practical management tools.
- Actionable recommendations that connect findings to controls, performance, and sustainability.
